

Mansi Verma

Senior Software Test Engineer

CERTIFICATION EARNED

Excellence certificate of testing summer training, Apex T G India Pvt Ltd.

Uplift Your Customer Services, NIIT Technologies

EXPERIENCE 3 Year

*Trainee – 6 Months
Software Engineer - Test – 3+ Years*

AREAS OF EXPERTISE

*Manual Testing
UI Testing
Backend Testing
Bug Tracking
Defect Reporting
API Testing*

TRAINING

Software Testing and Quality Assurance training from Apex T G India Pvt Ltd.

Training on testing tools and software testing from NIIT Technologies

PROFESSIONAL

Language Exposure: C, C++, HTML, Core Java, Programming Concepts
Skills: Business Analysis, Requirements Analysis, Manual testing
Operating System: Windows, Linux
Tools: Liaison, HP QC, JIRA, Jenkins, Real time devices for mobile testing
Database: MS SQL
Methodologies: Agile and knowledge of other SDLC Models
Testing: Manual Testing, Functional, Regression, Integration, Smoke, Sanity and Exploratory Testing, UAT
Other Tools: MS Office, Power point, Notepad++, MS Excel

PERSONAL SKILLS

*Communication Skills
Detail orientated
Decision making
Perseverance
Confident
Flexible & adaptable
Positive attitude
Team Work & Collaboration*

ACHIEVEMENTS

*Client Appreciation
Good feedback from managers
Excellence certificate in testing training*

JOB OBJECTIVE

Seeking long term employment in an organization where I can grow professionally and further enhance my skills, knowledge and experience to face and overcome the challenges of today's changing work environment.

PROFILE SUMMARY

Deadline oriented **senior software QA tester** with more than 3 year experience in manual testing environment. Expertise in the Ecommerce application, working in teams and easily collaborates with developers, project manager and business analyst to accomplish milestones. Solid history of discovering errors, tracking defects and ensuring client expectations are met with high quality software solution.

Hands-on technology professional accustomed to working in complex, project-based environments. Multifaceted experience in QA software testing and User Acceptance testing with full system development lifecycle experience, including designing, developing and implementing test plans, test cases and test processes fueling swift corrective actions, significant cost savings and fault-free audits.

SKILLS SUMMARY

Software Quality Assurance and Methodologies
Familiar with all Testing Concept & Techniques
Test plans and Case Development
Execution of test cases (Sprint Testing)
Functional Requirements
Regression and Negative Testing, Release Testing, UAT
Integration, Smoke, Sanity and Exploratory Testing
Test Strategies and Coverage
Agile/Scrum Expertise
Defects/Bug Tracing
QA & DC standards
*Jenkins Build Execution of Test Scripts
Automation Test Script Execution
Basic knowledge of Selenium Tool and API testing*

PROFESSIONAL EXPERIENCE

Senior Software Engineer - Test

COFORGE Ltd. (Predecessor-NIIT Technologies) [Oct2019-Sep21]

Project: SITA-Data Acquisition System (DAS)

Role: Senior Software Tester

Team Size: 30

Project Overview – DAS, a system for the acquisition and forwarding of API, PNR and DCS data. DAS normalizes acquired data and transmits standard formatted PNR, DCS and API records onto other applications for processing, analyzing and storage. DAS process the traveler data and forward to the Risk Manager for long term storage and risk assessment. It's through SITA network, Airline/GDS responses or communicate to the DAS commands.

Responsibilities:

- Testing most recent projects of DAS for INDIA, SPAIN, MAXXCOM and JAMAICA countries
- Testing PUSH and PULL messages of airline, eg. API, PNR, DCS, DB Data etc.
- Determining test objective and standards by studying/reviewing requirements
- Close monitoring of test timescales and adherence to testing gateways, Entry/Exit Criteria
- Analyzing and Running Regression test before every release

EXTRACURRICULAR ACTIVITIES

Member of college cultural event
Participate in Trikumbh C-
dareevent

EDUCATION

MCA, AKTU [2016-2018]
BCA, CCSU [2013-2016]

PERSONAL DETAILS

Mansi Verma
M: +91-9045176007
E: mansiverma.hpr@gmail.com

Passport: Yes
PAN: Yes

- Working Closely with the BA and Developers to clarify requirements, especially in terms of testability, consistency, and completeness to ensure on time delivery for each sprint
- Intensive communication with both onshore and offshore developers (In- house and third party), business analysts, database analysts, configuration management, project managers, test team
- Writing test scenarios and regression test suite to ensure maximum requirement coverage using testing techniques
- Giving functional KTs within and outside team to ensure smooth knowledge flow
- Taking care of Defect life cycle using Incident management tools - JIRA
- Identify software capability and reliability by conducting functional, non-functional Testing, Load, Airline configuration and End to End Testing
- Document any problems and work with project team to resolve problems identified during testing

Software Engineer - Test

NIIT Technologies [Aug2018-Sep2019]

Project: SITA- Horizon Reservation Desktop (HRDT)

Role: Senior Software Tester

Team Size: 7

Project Overview – Horizon Reservation Desktop is a new interface for reservations and customer service agents. ... With the graphical interface, new agents can be trained in just a few days. Multiple search features makes it easier to find prior bookings to make changes to seat assignments, flights, connections and more.

Responsibilities:

- Handle client meetings regarding Testing execution (TC reviews and analysis)
- Defect finding and logging into JIRA and Work with developers to track defects
- Guide team members regarding new functionalities
- Take requirements and create detailed, comprehensive and well-structure test plans based on requirements provided by the development team.
- Check User stories/acceptance criteria from Sprint backlog and create test cases/scenarios and execute automated test scripts using automated tools
- Setting up of test environments, and prioritize testing activities
- Inform the test lead what all resources will be required to perform testing
- Testing all aspects of the product/system like function/component, system, regression, back-end and front-end testing, taking part in the whole QA process
- Execute all test cases and report defects, define severity & priority for each defect
- Carry out regression testing every time when changes are made to fix defects.
- Maintaining and updating tests based on continuous feedback

Software Trainee

NIIT Technologies [Feb2018-July2018]

Learned manual, automation, performance, API Testing and gained basic knowledge of different testing tools i.e. Selenium, JMeter, HP QC, JIRA

Studied and gained understanding of the existing legacy system.

Documented user requirements in terms of Functional and Technical Specification

Project: Air India Ecommerce

Role: Software Tester Trainee

Responsibility: Functional testing performed, create test scenarios and carry out regression testing every time when changes are made to the code to fix defects

DECLARATION:

I hereby declare that the information given above is true to the best of my knowledge.
