## KNOWLEDGE AND SKILLS

---

Basics: Hands on MS-Office, Windows XP/7/10, Visual Basic and Excel

Technical Skills: PHP, VMware, Angular JS.

## WIPRO INFORMATION TECHNOLOGY (Jun 2019- Present)

---

### IDFC FIRST(OUR CLIENT)

Our project is based on In-App Payments SDK that supports payments on personal mobile devices by embedding a card entry form in a mobile app that produces nonce from customer-provided card information or digital wallet apps installed on the device.

## COLLEGE PROJECTS

---

### Online Books App

The app is our very own library for eBooks and audio books. We can enable users to read popular books by different authors or listen to their audio books. We can also search the books that we want to read next, based on different genres and categories.

### Expense Tracker App

I have built an expense tracking app which uses several basic implementations, react components and plug-in, that are important to get started with your mobile application development process. We can enable users to keep track of their day to day transactions which can also be available in a monthly and yearly basis. We can integrate their credit/debit cards, bank accounts through which we can directly pay the concerned authorities and keep track of it (this is a complex feature, so that bank integrations should be done at the end).
