Programming languages	:	PHP, NodeJs
Framework	:	Codeigniter, Laravel, Lumen
Scripting Languages	:	Javascript, JQuery
Frontend Technologies	:	Angular, React Js
Databases	:	MySql, SQL, Couchbase
Web Server	:	Apache
IDEs	:	Netbeans, Sublime Text, NotePad++
Operating Systems	:	Window 7/10/XP,Centos,Ubuntu,MacOS
Third Party Integration	:	Quickbooks, Bandwidth, Twilio, Google Maps, Highcharts, Fedex

---

## **EXPERTISE**

- Web development - **PHP ,HTML, CSS, JAVASCRIPT, JQUERY,Angular,Nodejs, React Js**
- PHP framework - **Laravel, Codignator, Lumen.**
- Database - **MySql** and **Couchbase** Databases.
- **APIs** for Android and iOS POS(Point Of Sale).
- Third party retail operations platform - **Brightpearl (ERP) & NetSuite (ERP).**
- Order and Stock management - **Revel to BrightPearl and NetSuite.**
- **Import & Export** CSV, XLS.
- Having knowledge of Parsing XML & JSON data.
- Pdf generation using **FPDF,MPDF**.
- Payment gateway - **Paypal, Heartland, Card Connect, Elavon, CardX ,NMI.**

- Having knowledge on the E-Commerce **platform** from scratch to order confirmation with Payment, Email, SMS notification and send for printing in the kitchen(For EPSON Printer).
- Having knowledge of **Highchart** for different types of reports.
- **Push Notification** for Android and IOS App Both.
- **Swagger** for api documentation.

## PROJECTS UNDERTAKEN

- **Allen Career Institute** :- A web application ,which finds student's test data in xls file that we have to import into our system and generate required reports for the client. Here each student can login to the system through his roll no and password and can see his reports subject wise, topic wise, test wise he can also compare with top 10 toppers. We show their performance through graph as well.
- **Delhi Academy of Medical Science** :- A web application, works on registration process of users and store data in database. Here the test associated with the user course will be visible to students. I have worked on the result generation process of test and showing their reports. OMR Students can also get their reports online and if the same test is also held by Online then reports will be shown after merging of OMR Student data and Online Student Data. Here I worked on the test page as well.
- **Charlotte Tilbury (www.charlottetilbury.com)** :- This is a UK based company, which provides online shopping for the users. This site is developed in Magento, this company also uses some ERPs like BRIGHTPEARL, NETSUITE to manage the orders, product inventory & shipping of orders with multiple warehouses. This company also takes orders using Revel APP (POS) for IPAD users. My work on this was to gather client requirements on Skype & developed the middle ware to send sales orders, customers, purchase order, stock adjustment from Revel to BRIGHTPEARL & update inventory from BRIGHTPEARL to revel on webhook trigger. Same work I did with NETSUITE as well except webhook. Also I send orders from BRIGHTPEARL to shipping companies to be shipped by putting CSV file on their FTP & read the dispatched orders CSV from their FTP to update the orders shipment & product inventory in BRIGHTPEARL. I have also worked on Revel POS apis for this project.
- **METISPRO Version 1** :- POS solution to the restaurants and retail clients. I have written all the **APIs for POS,Scanner App AND KDS** with all the major functionality including order split functionality. Here I write all the apis with **PHP & Mysql**. I was also responsible for all the database migrations. I also worked on **Gift Card** module where we provide gift cards to POS clients who can further distribute them to their customers to use as a payment option. I have also completed Web **E-Commerce solution** for the restaurants and retails customers with **printing concept for EPSON**. I also implement **Cardconnect** and **Heartland** payment gateway to accept credit card payments. To notify customers i used **Twilio(Mobile) AND SMTP(Email)**. We can also see reports for online orders in backend.
- **METISPRO Version 2** :- POS solution to the restaurant and retail client with local to cloud syncing technology. Here we are using **Nosql Couchbase** database. I have worked on the backend(Portal) for this project, where we provide all the basic components like Super Category, Category, Sub Category, Items, Modifiers, Vendor with Inventory Management module. We provide various types of reports to our clients. Write some migration script to move clients from version 1 to version 2. I also worked on a **Gift Card** module where we provide gift cards to POS clients who can

further distribute them to their customer to use as a payment option. I also write **APIS** for android/IOS application for scanner application and some payment related process. I also worked on **Web E-commerce solution** using **Couchbase** database with various payment gateways like **Cardconnect, Heartland, CardX, Elavon** with **kitchen printing for EPSON**. To notify customers used **Bandwidth(Mobile) AND SMTP(Email)**. We can also see reports for online orders in backend. Here I am also responsible for all the production **code/database migrations**. I also worked on Quickbooks to post customer required data to quickbook.

- **UCSF** :- Award verification application developed in Lumen and (Angular,React Js). Application allows the users to visualize and verify the financial data in graphical format(C3 and D3 Charts) on a monthly basis. I worked here as a full stack developer using (Angular, React Js), Lumen, SQL, Apache,Material Design,Bootstrap,C3 Charts.

## **DECLARATION**

I am confirming that all the information provided above is true to the best of my knowledge and can be supported if necessary.
