Very passionate about working as a creative person who likes to create many new things with help of my favorite tools of Adobe and Autodesk. Learning is the best part of my personality. My last employer was Navdurga Enterprises before that I was working Sarla and Praxis

Also have experience to work in 3D MODELING specially in interior modeling with bit of interest in interior I also developed skill to deal with vray rendering and 3d modeling.

At Sarla I was the only graphic designer holding their event With Praxis I was part of the creative department which helped me to gain a great experience in my career

I also worked with few more companies. as JLT Independent and First Reel Media.

Always had an attitude that my work speak for me so to create it in the best way possible from scratch to end result

Hobbies are the best way to know yourself when you have no one around you have your hobbies with you & since childhood am active with physical activity.

We all need tools to express ourselves language is the best we ever created. In the stone age, we had stick drawing which is evolved to pictorial visual. Now they can be created with a computer with very ease due to many software but I chose this few tools to express my creativity and still upgrading to this list.
