## EXPERIENCE

### Capgemini Engineering, Gurugram — Senior Software Engg

Jan 2019 - PRESENT

- Work as Android and iOS domain with java in Android and swift in iOS.
- Have completed two projects here, current one with Motorola Solutions and past one with Samsung Research Institute.
  - **Motorola Solutions-**: My roles and responsibilities are to fix per day issues coming from customers by analysing the logs and reproducing them and also working on many features on Both of the Platforms like MDM, MFA, Customer requirements.
  - **Samsung Research Institute-**: Here I am on the Samsung Keyboard team and my role is to fix perday issues coming from testers on new launch devices and existing issues on old devices too. Also I have deployed in multiple Task forces where I have built new features for the company.

### Nearpins, Noida sec 135 — Team Lead Android

Feb 2018 - Dec 2018

- My role here is to make their product from the start. It's a services provider app where users can book a service and vendors will send their workers to complete this. Also there is a module where food delivery is available. I have to manage and complete this with 3 more members of my team.
- Worked in Android TV app which is a video streaming and ads platform.

### Kliff Technologies, Dwarka — Android application developer

Sep 2016 - Sep 2017

- Design Develop and release 9 apps here.
- My roles and responsibilities are to make apps from scratch and also work on webservices in php.
- Apps like Music Player, Chat app, Ecommerce, Service Providers, finance.
