- **Kendriya Vidyalaya Chamera 1**
10th and 12th Class June 2011 – June 2013
 - Passed with 60%
- **B.tech From IKGPTU**
Swami Vivekananda Institute of Engineering & Technology (Punjab Technical University). June 2017
 - Graduated with 70% Marks

Testing Skills

Methodology	Agile Methodology
Office Tools	MS Word, Excel, PowerPoint.
Bug Tracking & Management Tools	JIRA, Mantis, Tracking Management Tool.
Testing Skills	Functional, Regression, GUI, Sanity, Integration, System Testing, Acceptance Testing, UAT, Globalization Testing and smoke.
Applications	Buyback Application, Belmont trading, UPC Insurance, E-Commerce.
Environments	QA, UAT & Production

WORK EXPERIENCE

PROJECT 1

Client & Project Name	UPC Insurance
Domain	Insurance
Role	Test Engineer
Test Tools	Manual Testing, Web based
Project/Defect Management Tools	Jira, Management tools.
Description	We are dedicated to providing outstanding service. Since 1999, policyholders and agents have counted on UPC Insurance to be here at the time of need. Through our unwavering dedication to Keeping the Promise and serving our customers, UPC Insurance is one of the top writers of homeowners insurance and related lines in the nation.
Role & Responsibilities	<ul style="list-style-type: none">• Manual Tester Deliverables• Analysing the requirements from clients• Arranging Test Environment to execute the test cases• Attended Internal meetings to understand and test according to their requirements• Defect Tracking• Communicating with Test leads• Reporting of bugs to developers so as to fix it• Test Cases for various testing processes• Summary Reports• Test Data for test cases• Lesson Learnt documents (based on testing inputs from previous project)• Suggestion Documents (to improve software quality)• Test Scenarios

PROJECT 2

Client & Project Name	Veridic Technologies
Domain	Buyback domain
Role	Junior Software Tester
Test Tools	Web Application, Mobile Application.
Project/Defect Management Tools	Mantis
Description	<p>A Web application which provides services to customers who wish to trade their devices. Customer can trade in directly through Online Portal or Mobile diagnostic (iOS + Android) applications which work in conjunction with online portal. There is a Warehouse Manager System to Receive, inspect and grade trade in devices. Warehouse application, which handles the total retail, online and calls center Application. It's the base to value all the applications. It's a customized solution to our client to maintain and recycle the handsets of all received and also helps in the selling of the units managing the proper value to the customer and market business constantly.</p>
Role & Responsibilities	<ul style="list-style-type: none">• Attended review meetings with Business Analysts, Developers and end users to understand and test according to their requirements• Writing Test Cases, Test scenarios from requirements.• Performed different types of Testing: White Box (Unit Testing, Integration testing), Black Box, Smoke, Functionality, Integration, System, Performance, Positive Testing and Negative Testing, Regression Testing and Testing Life Cycle.• Worked on Agile Methodology as well as Verification and Validation based on Testing.• Worked on API Testing using Postman.• Tested websites for reliability, consistency and absence of defects.• Compiled lists of defects or design issues found during testing.• Performed the Database Testing using SQL Server.

PROJECT 3

Client & Project Name	ASTM (American Society for Testing and Materials)
Domain	E-Commerce Domain
Role	Test Engineer
Test Tools	Manual Testing, Web based, Dbeaver

Project/Defect Management Tools	Jira, Management tools.
Description	ASTM International , formerly known as American Society for Testing and Materials , is an international standards organization that develops and publishes voluntary consensus technical standards for a wide range of materials, products, systems, and services.
