Working as Software Test Engineer in **Tieto India Pvt. Ltd, Pune** from Jan 2020 to till date.

PROJECT SUMMARY

Project Name : CSS
Domain : Investment Banking
Client : M & G Investments, USA

Description:

M & G Investments has designed an Account Dashboard that gives you two separate columns to make your daily, weekly and monthly account and market activity easier and faster to read. One column gives you a snapshot of your account with a dynamic display while the other focuses on market movers, indices and news. A snapshot of the account through it we can check account balances, Review your order status, Organize orderstatus by orders and executions, Manage multiple accounts in one central location, organize value charts for weekly, biweekly, monthly and bimonthly performance with Stop losses and margin for both equity and derivatives also See a list of the day's movers: watch the equities that have gained or lost the most throughout the day.

Role / Responsibilities:

- Generating the Test scenarios and Test cases.
- Generating Regression Test scripts by extracting the requirements that need to be tested from available documents.
- Developed Automation Test Scripts.
- Creating POM (page object model) and Test classes for the framework.
- Retesting defect fixes on each release build.
- Performed Sanity, Functional, Retesting, Regression testing.
- Experience in TestNG framework with Webdriver.
- Performed parameterization to implement Data Driven framework.
- Participated in weekly status meetings with the team, developers to discuss open issues.
- Propose improvements to current practices ensuring that approved enhancement are fully implemented and the repeat errors are eliminated.

Project Name : Wireless Billing System
Domain : Telecom BSS
Client : Globalsat Group, USA
Role : QA Manual

Description:

This 'CRM- Billing and payment 'allows communications service providers (CSPs) to integrate Comarch Customer Relationship Management (CRM) applications with third-party billing systems, eliminating the need to develop customized integration solutions.

With KPN` Telecommunications Billing Integrator, CSPs can leverage open standards to improve their customer relationships and reduce the time and cost associated with integrating their CRM system and third party billing systems."

Key advantages:

- Bill more quickly and accurately when an order is placed by communicating relevant account, order and product information to the billing system in the form of a communications industry-specific XML message
- Track all messages published to the billing system and update customer records accordingly
- Maintain accurate data by synchronizing the product catalog with the billing system
- Help customer service representatives to record customer complaints in most easy way.
- View bill summary information and bill images, as well as search customer records by account, order or product/item number - allowing customer service representatives to call up relevant data when responding to customer inquiries.

Role / Job Responsibilities:

- Provide regular reports on various aspects of projects underway. Ensure on-time deliveries.
- Analysis of Requirement [Functional, Design] document.
- Validating the UI functionalities with the Visual designs.
- Validating the input fields with the given validations.
- Verifying the Database using SQL queries.
- Prepare Test Summaries and Also Prepare, analyze and Execute test Cases.
- Redesigning the test cases according to the changes in Product.
- Co-ordinate with client on weekly basis.
- Preparing daily status report, weekly status report etc.

EDUCATION

- **Bachelor of Engineering** from swami ramanand teerth Marathwada University, Nanded.
