PROJECT:**Project Operations Monitoring:**

Company: Attra Infotech

Project Name: Trust Care Health

Client Name	Trust Care
Role	Software Test Engineer
Business Vertical	Healthcare
Tools	JIRA
Technology	SQL, HP ALM & QC

Project Description:

Trust Care Health is a privately owned US based health company with several urgent care clinics that delivers the highest quality care while providing exceptional patient experiences in a modern and inviting environment.

Trust Care Health offers healthcare options such as direct primary care, tele health, pediatric primary, pharmacy discount program, and employer services such as occupational medicine and workers compensation. Tested High level modules include Services, Patient resources, Trust Care Kids, Search, Location and Employer services. Low level modules include urgent care, direct primary care, digital X-rays, vaccine & immunizations, patient portal, paybills and patient forms.

Tested on different modules with all functional and non-functional scenarios including with the design techniques (direct primary care, digital X-rays, vaccine & immunizations, patient portal, paybills and patient forms). Worked with the **CRM** Applications.

Responsibilities:

- Involved in requirement walkthrough calls with business for a better understanding of the requirement specification document.
- Identified end-to-end test cases, regression suites, and system test cases.
- Documented test cases and performed peer reviews on the teammate's work.
- Responsible for Smoke and Sanity test.
- Expertise in executing regression test cases and impact analysis.
- Executed test cases as per system requirements and ensure test data meets the requirements and guidelines.
- Performed elaborate functional testing for admin module along with exploratory testing of the entire site. Also worked on test case maintenance when necessary.
- Performed browser compatibility testing on browsers Chrome 2.0 and Mozilla Firefox 5.0 & 6.0 versions.
- JIRA was used for issue tracking in case of environmental issues.
- HP ALM/JIRA was used for test management and defect management.
- Created a Traceability Matrix to ensure 100% test coverage.
- Prepared and sent daily reports – test execution report and bug report.
- Involved in PVT (Product Validation Test), Preparation of final closure report.
