PROJECTS:

- **Laser Security Alarm System (1st Year):** We made an online hostel management form which helps the management to save the records of each student about their rooms and

other things. The main objective of the project was to improve the services for all the students of the hostels.

- **Hostel Feedback Application Form (2nd year):** Objective of this system is automation and advancement of security for a facility and One-time investment with almost no maintenance cost.

- **Online Bus Management System (3rd year):** Online Bus Management System is a window based application. In this project student can see the timing of buses, detail about the routes of buses. And Admin can update, delete and view the information like timing of buses, routes of buses, and also can add new routes.

- **Menu Pages (4th year):** Menu Pages site will catalog menus for thousands of restaurants in a growing number of cities. User can see the reviews of the items by various customers. Two types of user can login in this site admin and customer. One Admin, who can add, delete new menus. And can see the menus of various restaurants. Customer can see the menu pages and can give their reviews.

SKILLS:

- **Languages:** Java, C++, C.
- **Web Technologies:** HTML, CSS, JavaScript, Bootstrap
- **Server Side:** Node Js
