Learn to create responsive and interactive web pages using JavaScript and Bootstrap
Use of Redux and Hooks, to create a temporary storage and store your whole application data.

Projects-

- **BHARAT SCIENTIFIC EQUIPMENTS (Technical / Industrial base website)**

In this project, I built a responsive and fully user-friendly website using Html, CSS and JavaScript and used all the codes of front-end languages by which I made a sticky navbar, carousel - a slideshow component for cycling through elements—images & text, different color shades on divisions or sections by using of media query and hover.

- **TRAVELLING AND TOURISM WEBSITE**

This project is based on travelling and tourism, in this website I have created a form in which any person can choose his favorite travel pack and search & explore our favorite place in the world through search section. Along with that, I have also given short video clips in it, due to which the user also has the experience to easily see his favorite place.
