Tested with filezilla, these details work.

Issue:

We integrated Moneris payment gateway plugin using “ TP Moneris” plugin on this page

<https://dev.drsvitachaudhry.ca/pay-online/>

When we activate the plugin, there are a lot of jquery errors

```
Uncaught TypeError: url.indexOf is not a function
    at jQuery.fn.init.load (jquery-3.5.1.js?ver=1619053588:10353)
    at (index):212

```

This issue cause some conflict and the website's main top menu disappears. There maybe other issues but right now this issues makes the website unusable with this plugins.
